I have over **one year** of internship and working experience at Viettel Technology Investment Co., Ltd. as a **Mobile Application Developer** specializing in React Native. During this time, I actively participated in and contributed to the company's key projects while continuously improving my programming and teamwork skills. With a strong passion for mobile development, I aim to further enhance my expertise and become a React Native expert capable of building high-quality, seamless, and user-friendly applications through continuous learning and professional growth.

Work Experience

React Native Developer • Viettel Technology Investment Co., Ltd.

March 2025 to present

- **Mosan e-wallet**

- Developed additional features for the **Vops** application, including request and approval functionality for commendation titles.
- **Team size : 8** members including 3 backend developers, 3 frontend developers, and 2 testers.
- **My roles include:**
 - Integrate APIs to display data on the Commission and Transaction screens. Handle related events, including the Pull to Refresh feature and Load More when scrolling to fetch additional events. Manage loading states and errors while optimizing list performance using FlatList. Fix bugs to ensure a smooth user experience.
 - Wrote reusable code to enhance the interactivity of the mobile application using **React Native** and **Redux Saga**.

February 2025 - March 2025

- **Vops application**

- Developed additional features for the **Vops** application, including request and approval functionality for commendation titles.
- **Team size : 8** members including 3 backend developers, 3 frontend developers, and 2 testers.
- **My roles include:**
 - Integrated API to display the event list, developed the Dashboard screen with pull-to-refresh for data updates and Load More to fetch additional events when scrolling. Handled loading and error states, optimized list performance using FlatList, and fixed bugs to ensure a smooth user experience.
 - Wrote reusable code to enhance the interactivity of the mobile application using **React Native** and **Redux Saga**.

January 2025 - February 2025

- **Natcash Agent** is a mobile financial management service in Haiti that offers features such as depositing, withdrawing, transferring money, recharging, and making digital payments quickly, safely. The Natcash Agent app was launched to provide the best mobile financial experience, enabling customers to send and receive money, pay for goods, access their bank accounts, and perform transactions anytime, anywhere.
- **Team size : 7** members including 3 backend developers, 2 frontend developers, and 2 testers
- **My roles include:**
 - Assisted in integrating payment APIs from banking partners and third-party payment services and fixed bugs to ensure a smooth user experience. .
 - Wrote reusable code to enhance the interactivity of the mobile application using **React Native** and **Redux Saga**

React JS Developer • Viettel Technology Investment Co., Ltd.

October 2024 - December 2024

• **Reconciliation System**

- **Reconciliation System an automated system for reconciling financial data and banking transactions.**
- **Team size : 8** members including 3 backend developers, 3 frontend developers, and 2 testers.
- **My roles include:**
 - Designed a reconciliation management interface, displaying detailed information about transactions, discrepancies, and processing statuses.
 - Assisted in integrating APIs to connect data from banks and relevant stakeholders.
 - Wrote reusable code to enhance the interactivity of the website using **React JS**, **Redux Toolkit + Saga**, and **i18n**.
 - Built a user-friendly, responsive interface using **Ant Design** and **Tailwind**

React Native Developer • Viettel Technology Investment Co., Ltd.

July 2024 - September 2024

• **Vops application**

- **Vops** application to facilitate quick communication between departments. timekeeping, attendance, calendar registration,...
- **Team size : 9** members including 3 backend developers, 4 frontend developers, and 2 testers.
- **My roles include:**
 - Participate in designing and creating modals with event filtering functions, changing event colors and fixed bugs to ensure a smooth user experience.
 - Wrote reusable code to enhance the interactivity of the mobile application using **React Native** and **Redux Saga**.

May 2024 - June 2024

• **Mosan e-wallet**

- **Mosan e-wallet** application providing online payment services such as money transfers, bill payments, tuition fee payments, and mobile top-ups.
- **Team size : 8** members including 3 backend developers, 3 frontend developers, and 2 testers.

- **My roles include:**

- Contributed to the design of the user interface, ensuring a smooth and user-friendly experience.
- Assisted in integrating payment APIs from banking partners and third-party payment services.
- Wrote reusable code to enhance the interactivity of the mobile application using **React Native** and **Redux Saga**

Intern • Viettel Technology Investment Co., Ltd.

February 2024 - April 2024 | intern

- **Clone UI Facebook**

- Facebook Home screen clone built with **React Native**, featuring interactive animations and multimedia functionality. The app uses **React Native Reanimated** to create smooth animations, such as interactive icon drop effects, **React Native Video** for seamless playback of short videos, and **React Native Image Zoom Viewer** for viewing and zooming into images effortlessly. This project showcases the integration of advanced libraries to deliver an engaging and dynamic user experience.

- **Music App MP3**

- A React Native music application built with **React Native Track Player** for seamless audio playback and **Redux Saga** for efficient state management, including handling play and pause functionality. The app leverages **React Native Reanimated** to create smooth animations for music playback effects and interactive actions with icons. Key features include playlist creation, music playback controls, and a clean, user-friendly interface. Designed to deliver a dynamic, engaging, and responsive user experience.

Education

Hanoi University of Business and Technology

- Information Technology • 2019 - 2023
- GPA: 3.3/4

Skills

- **React JS** - Basics
- **Firebase** - Authentication, Push Notifications (FCM)
- **State Management** - Redux Saga, Redux Toolkit, Context API
- **Version Control** - Git, GitHub/GitLab

FOREIGN LANGUAGES

- English - Reading and Writing
